

The Indian Card Clothing Company Ltd.

Company History and Overview

The Indian Card Clothing Co. Ltd has been an innovator in card clothing manufacturing since its inception in 1955. Originally a joint venture between Carclo Engineering Group and English Card Clothing, this company was established to solidify the presence of these private industries in India by shifting their manufacturing for the Indian market to the domestic level.

After Carclo acquired English Card Clothing in 1979, it became the largest, global card clothing manufacturer and provider. ICC helped pioneer this change, through the development of metallic card clothing, replacing flexibles in the cotton carding process.

In 1978, following Indira Gandhi's Foreign Exchange Regulation Act (1973), Carclo diluted its share from 100% to 74%, with the outstanding shares being offered to domestic directors, employees and the general public. Finally, in 1985, English Card Clothing (a complete subsidiary of Carclo) sold its 57% stake in ICC, divesting its controlling interest and allowing the company to take on new management.

Who we are

Our Mission

"To serve the Global Card Clothing Industry through:

Constant Innovation

Timely Supplies

Best in Class Manufacturing Standards

Best in Class Quality & After Sales Support

Inspired Human Resource

Customer Centricity"

Our Vision

To be the world's best integrated card clothing and card room accessories solution provider, driven by research and innovation, with a clear leadership position across products and markets, while exceeding stakeholder expectation.
